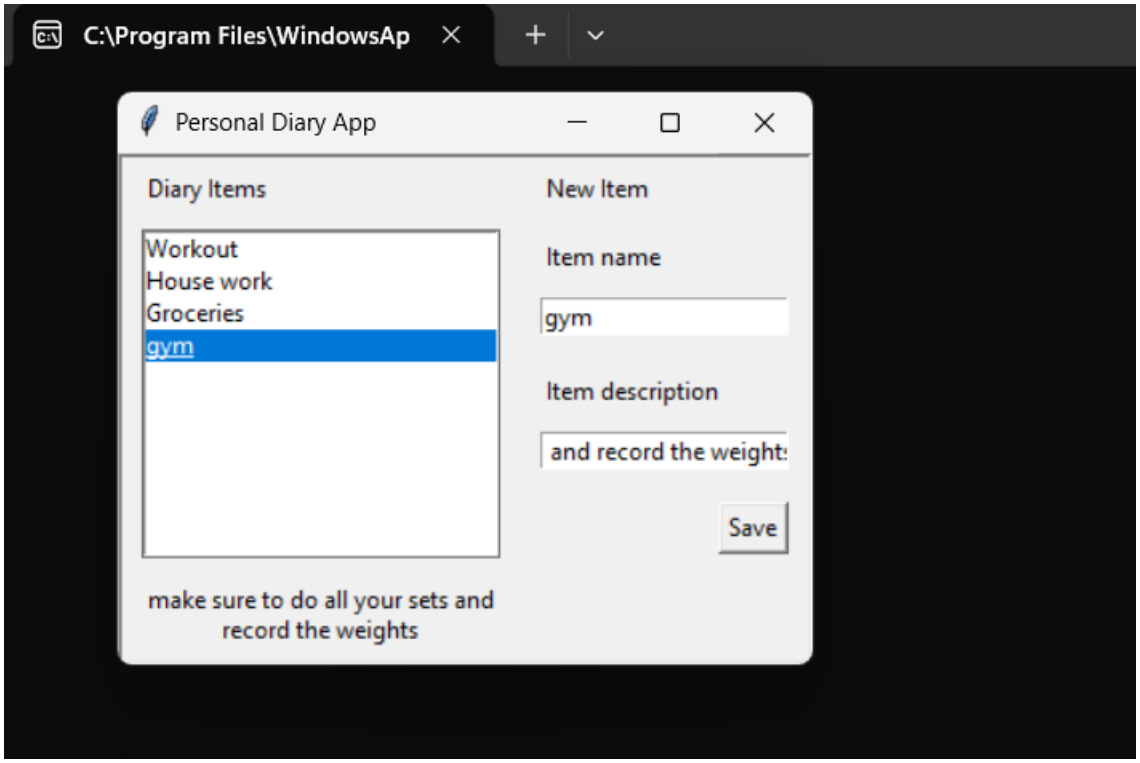
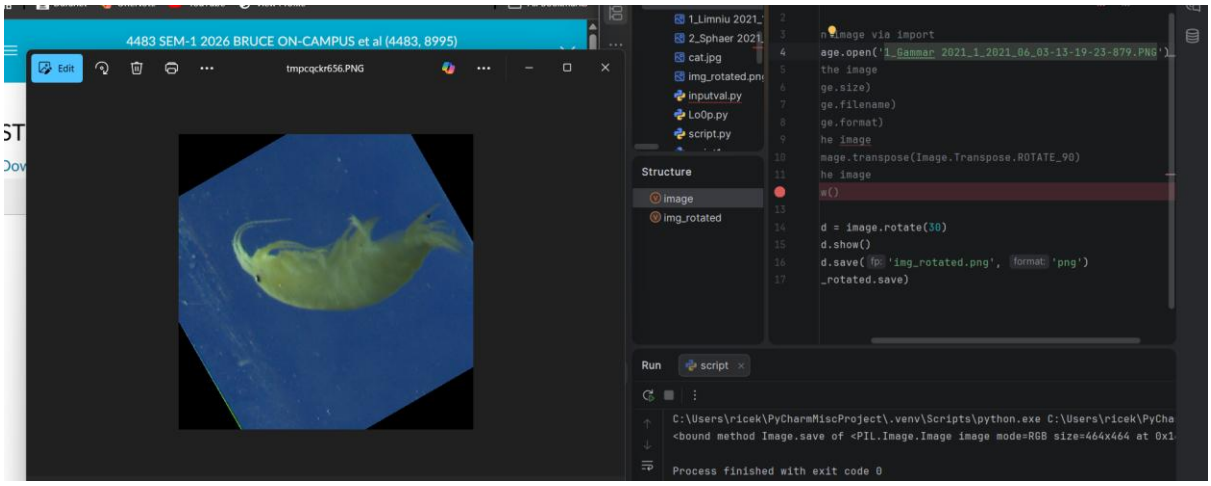
Week_4_lab_report.pdf

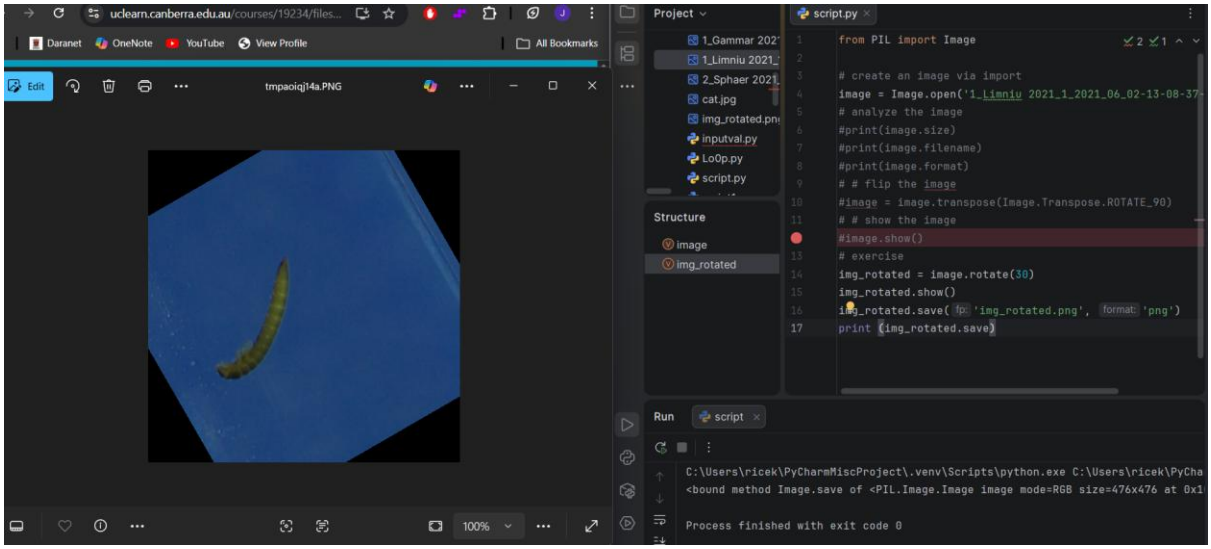
Task 1

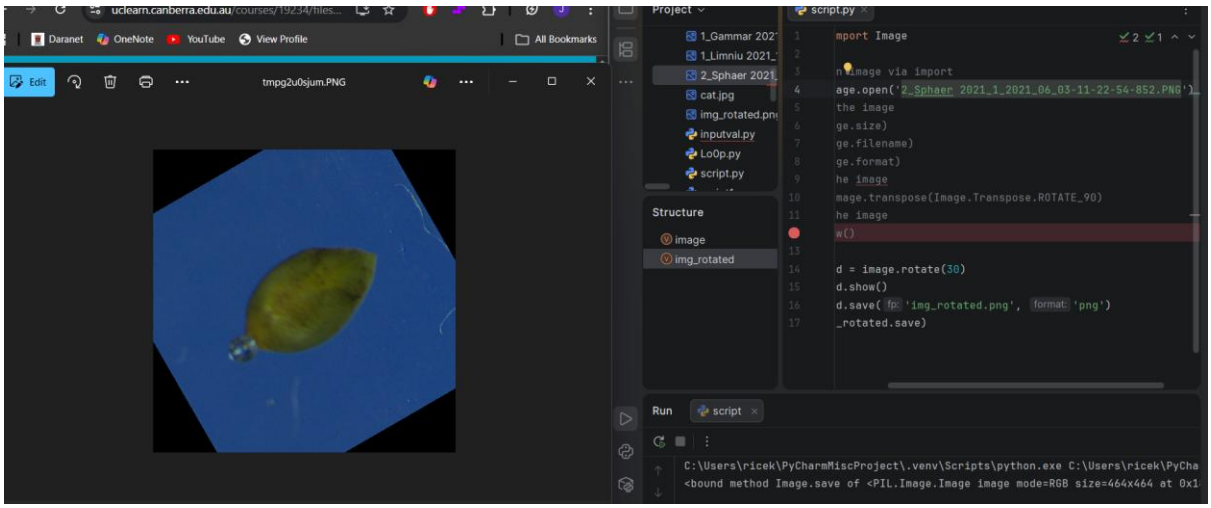


The program allows me to record stuff I want to do or already have done acting as is intended to be which is a diary.

Task 2

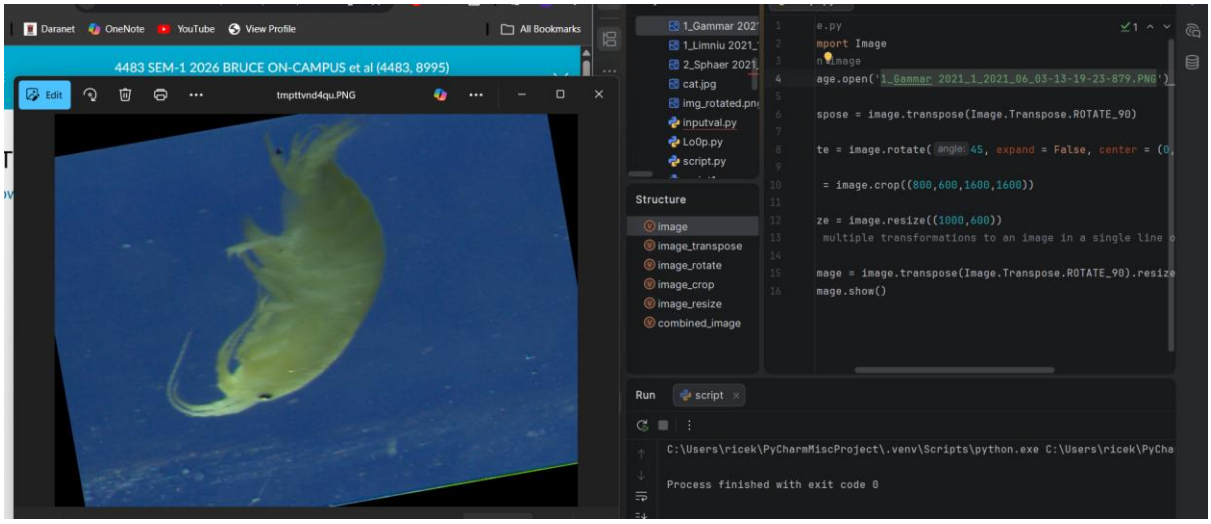






All 3 programs have being turned 30 degrees and saved as a png

Task 3



4483 SEM-1 2026 BRUCE ON-CAMPUS et al (4483, 8995)
tmpttvnd4qu.PNG
1_Gammar 2021_1_2021_06_03-13-19-23-879.PNG
spose = image.transpose(Image.Transpose.ROTATE_90)
te = image.rotate(angle: 45, expand = False, center = (0,
= image.crop((800,600,1600,1600))
ze = image.resize((1000,600))
multiple transformations to an image in a single line
mage = image.transpose(Image.Transpose.ROTATE_90).resize
mage.show()
Structure
image
image_transpose
image_rotate
image_crop
image_resize
combined_image
Run
script
C:\Users\ricek\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\ricek\PyCha
Process finished with exit code 0

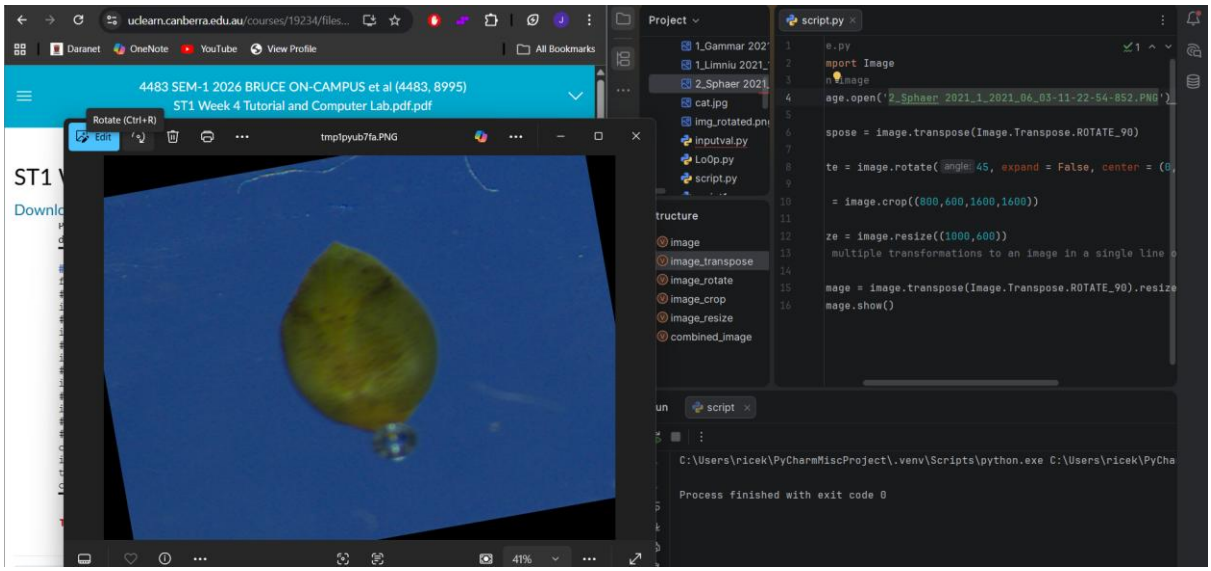
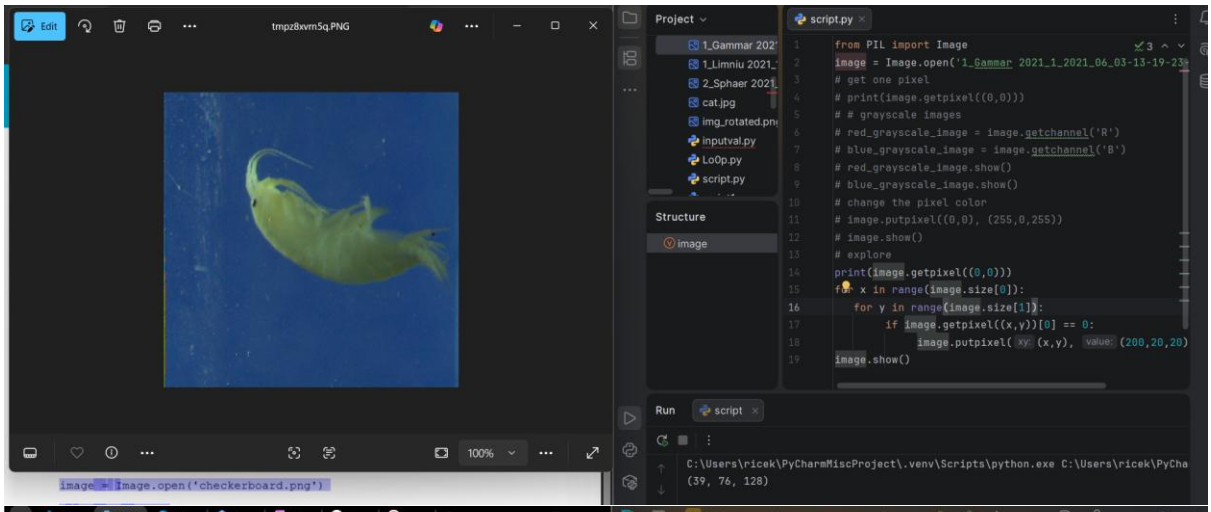
Process finished with exit code 0

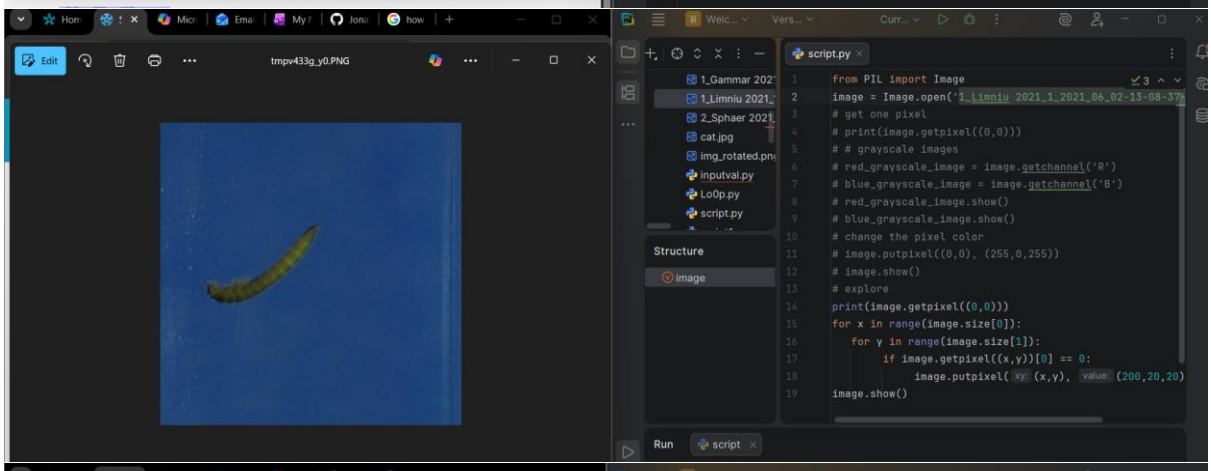


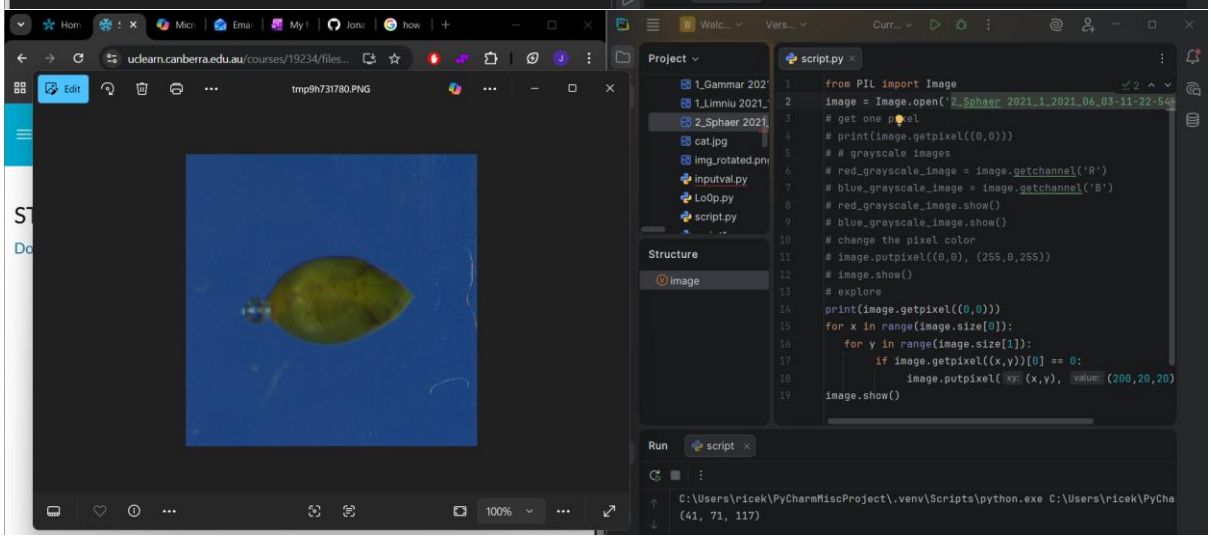
4483 SEM-1 2026 BRUCE ON-CAMPUS et al (4483, 8995)
ST1 Week 4 Tutorial and Computer Lab.pdf.pdf
tmp1pyub7fa.PNG
2_Sphaer 2021_1_2021_06_03-11-22-54-852.PNG
spose = image.transpose(Image.Transpose.ROTATE_90)
te = image.rotate(angle: 45, expand = False, center = (0,
= image.crop((800,600,1600,1600))
ze = image.resize((1000,600))
multiple transformations to an image in a single line
mage = image.transpose(Image.Transpose.ROTATE_90).resize
mage.show()
image
image_transpose
image_rotate
image_crop
image_resize
combined_image
script
C:\Users\ricek\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\ricek\PyCha
Process finished with exit code 0

All images have been resized larger and put into a different angle direction due to the crop

Task 4

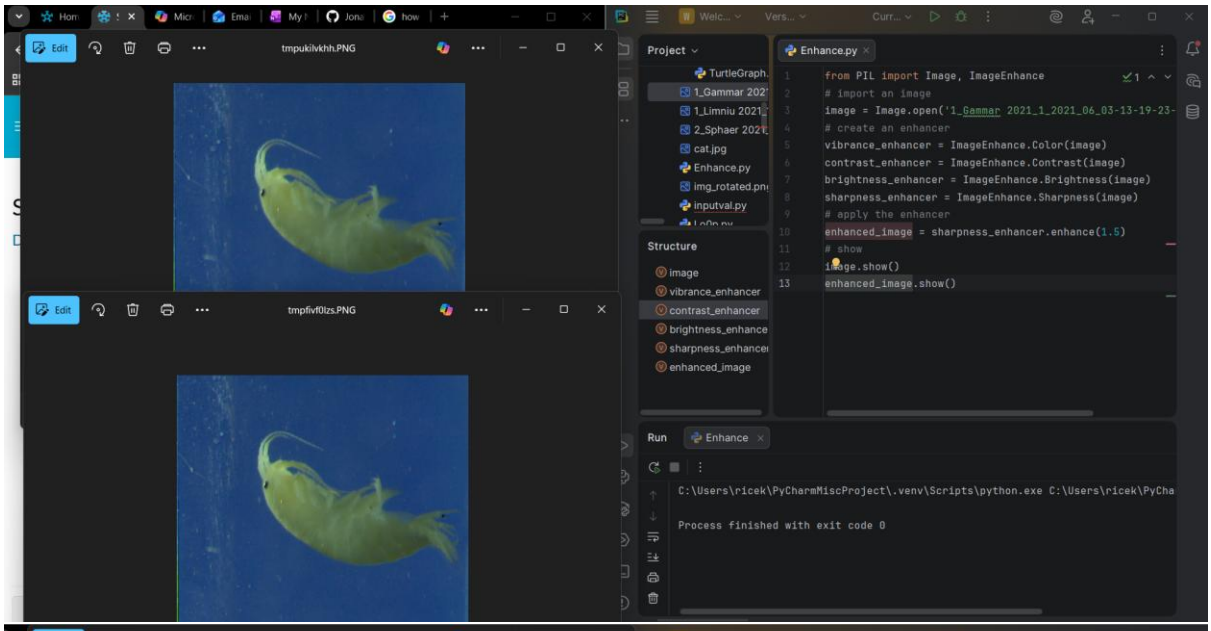




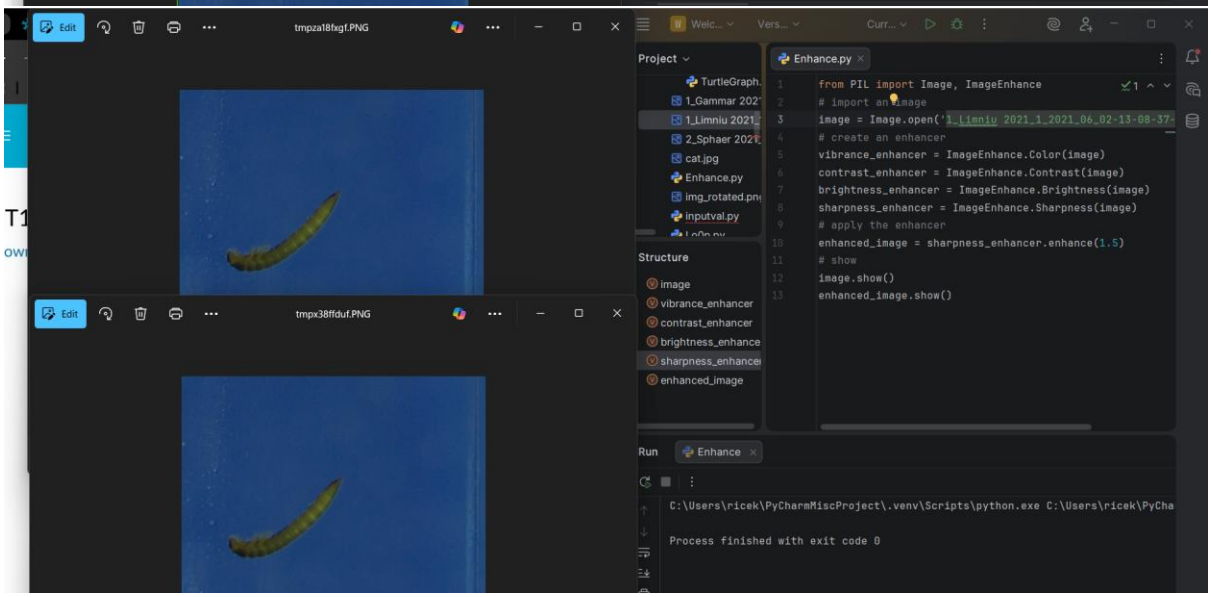


All images have had their rgb stated in the print section highlighting the colour values

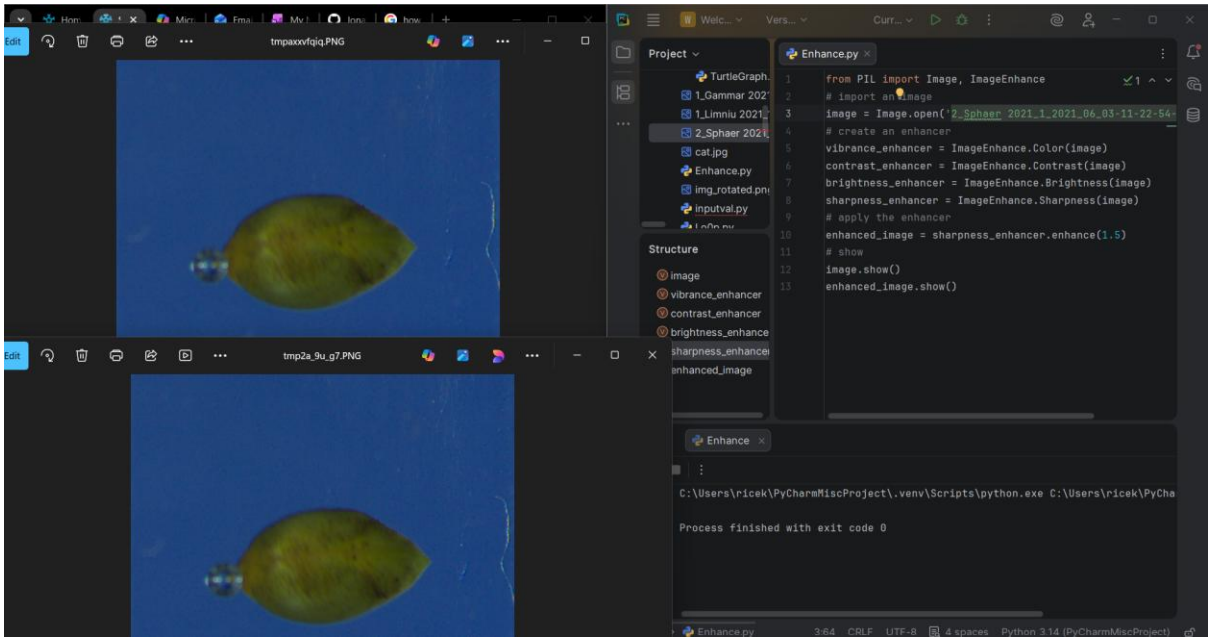
Task 5



tmpukilvkhh.PNG
tmpfivf0lzs.PNG
Enhance.py
from PIL import Image, ImageEnhance
# import an image
image = Image.open('1_Gammar 2021_1_2021_06_03-13-19-23-
# create an enhancer
vibrance_enhancer = ImageEnhance.Color(image)
contrast_enhancer = ImageEnhance.Contrast(image)
brightness_enhancer = ImageEnhance.Brightness(image)
sharpness_enhancer = ImageEnhance.Sharpness(image)
# apply the enhancer
enhanced_image = sharpness_enhancer.enhance(1.5)
# show
image.show()
enhanced_image.show()
Run
Enhance
C:\Users\ricek\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\ricek\PyCha
Process finished with exit code 0

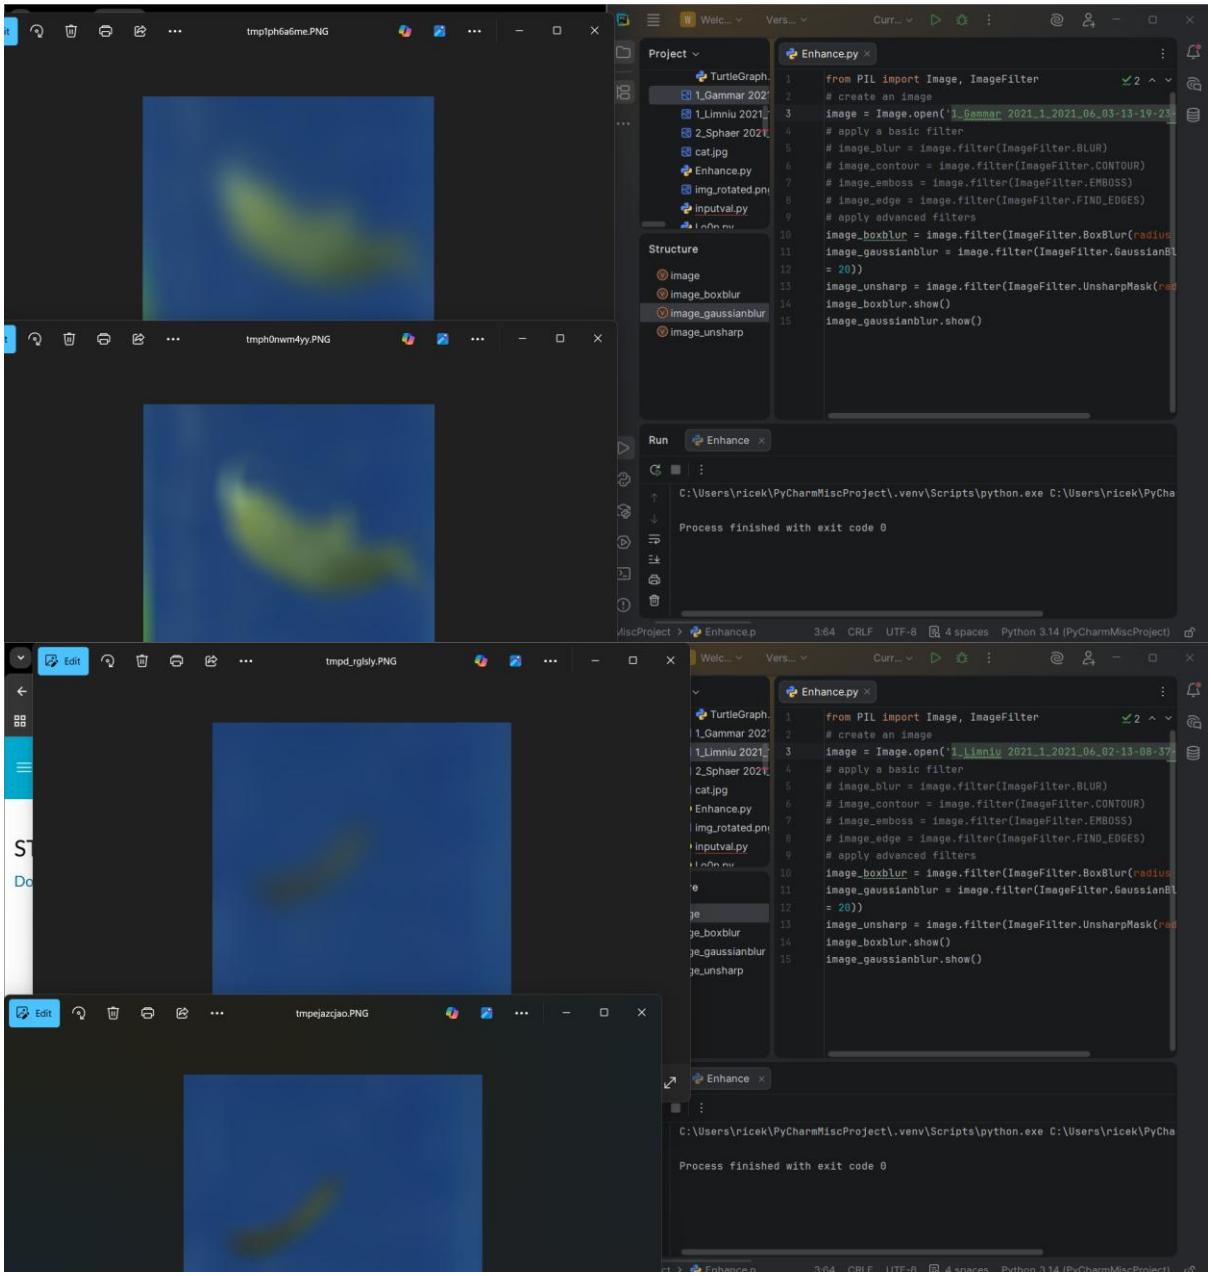


tmpza18fxgf.PNG
tmpx38ffduf.PNG
Enhance.py
from PIL import Image, ImageEnhance
# import an image
image = Image.open('1_Limniu 2021_1_2021_06_02-13-08-37-
# create an enhancer
vibrance_enhancer = ImageEnhance.Color(image)
contrast_enhancer = ImageEnhance.Contrast(image)
brightness_enhancer = ImageEnhance.Brightness(image)
sharpness_enhancer = ImageEnhance.Sharpness(image)
# apply the enhancer
enhanced_image = sharpness_enhancer.enhance(1.5)
# show
image.show()
enhanced_image.show()
Run
Enhance
C:\Users\ricek\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\ricek\PyCha
Process finished with exit code 0

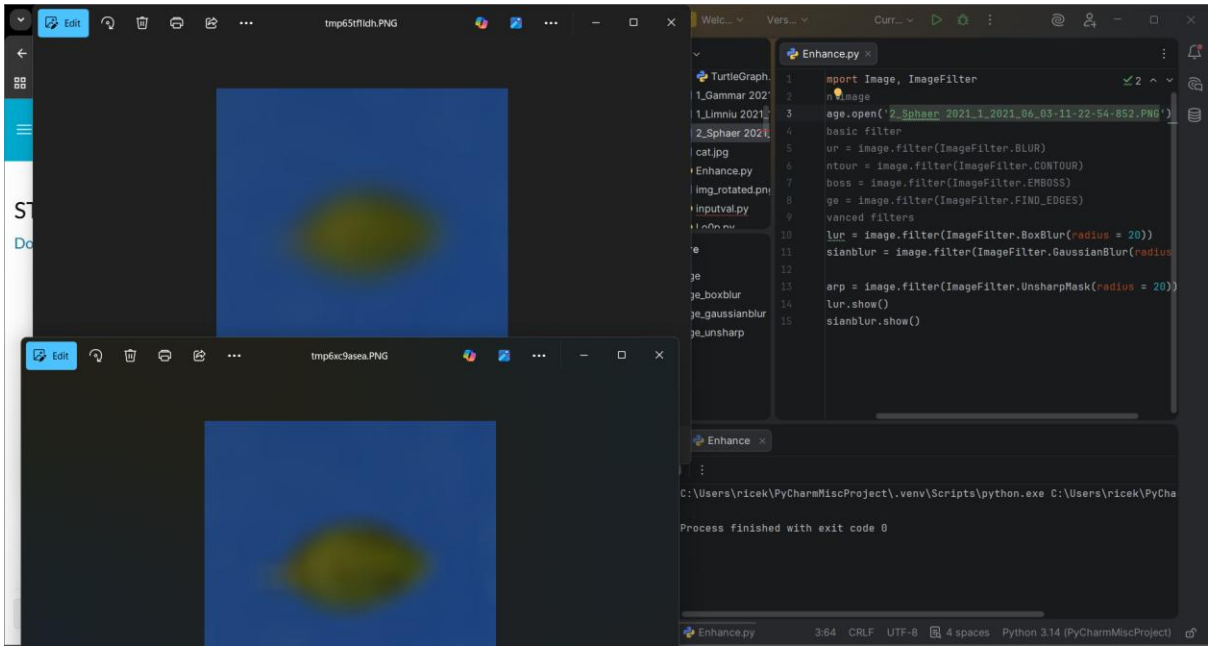


All images have been enhanced with a sharpness giving it a more enhanced and defined look

Task 6



tmp1ph6a6me.PNG
tmph0nwm4yy.PNG
tmpd_rglsly.PNG
tmpejazcjao.PNG
Enhance.py
from PIL import Image, ImageFilter
# create an image
image = Image.open('1_Gammar 2021_1_2021_06_03-13-19-23
# apply a basic filter
# image_blur = image.filter(ImageFilter.BLUR)
# image_contour = image.filter(ImageFilter.CONTOUR)
# image_emboss = image.filter(ImageFilter.EMBOSS)
# image_edge = image.filter(ImageFilter.FIND_EDGES)
# apply advanced filters
image_boxblur = image.filter(ImageFilter.BoxBlur(radius
image_gaussianblur = image.filter(ImageFilter.GaussianBl
= 20))
image_unsharp = image.filter(ImageFilter.UnsharpMask(rad
image_boxblur.show()
image_gaussianblur.show()
Run
Enhance
C:\Users\ricek\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\ricek\PyCha
Process finished with exit code 0
Enhance.py
from PIL import Image, ImageFilter
# create an image
image = Image.open('1_Limniu 2021_1_2021_06_02-13-08-37
# apply a basic filter
# image_blur = image.filter(ImageFilter.BLUR)
# image_contour = image.filter(ImageFilter.CONTOUR)
# image_emboss = image.filter(ImageFilter.EMBOSS)
# image_edge = image.filter(ImageFilter.FIND_EDGES)
# apply advanced filters
image_boxblur = image.filter(ImageFilter.BoxBlur(radius
image_gaussianblur = image.filter(ImageFilter.GaussianBl
= 20))
image_unsharp = image.filter(ImageFilter.UnsharpMask(rad
image_boxblur.show()
image_gaussianblur.show()
Enhance
C:\Users\ricek\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\ricek\PyCha
Process finished with exit code 0



All images have been blured through the filter coding

Task 7

All images have been recoulired and changed through the image inverted coding.
